

Feel, hear and sense your blades

Holistic blade health monitoring

eologix-ping.com

All-in-one insights

WHY CHOOSE US?

Well proven technology & expertise
More than 2000 turbines worldwide in 27+ countries in operation

Holistic monitoring and analysis
Get insights into your blade and detect issues early

Customer-centric focus
Our dedication to our customers doesn't end with the installation of our systems.

YOUR BENEFITS

Feel, hear and sense your blades with our all-in-one insights you can

- ✓ Enhance safety
- ✓ Maximize uptime
- ✓ Reduce costs
- ✓ Make data-backed decisions
- ✓ Ensure optimal performance

Customer centric team

46

team members in 6 countries

Export into 27 countries

100

More than 100 years experience in wind

WHAT WE DO

At eologix-Ping, we are the leading experts in all-encompassing rotor blade monitoring. Our mission is to fortify wind energy generation by enabling precise monitoring of rotor blade condition and performance as well as to empower our clients in optimizing energy generation. With operational bases in Austria and Australia, we specialize in the development and production of these sensor solutions, which are currently in use worldwide.

OUR SOLUTIONS

Intelligent fusion of vibrational, acoustic and other sensor technologies

- ✓ Open & OEM-independent
- ✓ High reliability due to sensor fusion
- ✓ Simple installation
- ✓ Modular & retrofittable

OUR PRODUCTS

We offer different blade monitoring solutions to get a holistic oversight of your blade.

- ✓ Ext. surface damage monitoring
- ✓ Internal structure damage monitoring
- ✓ Ice detection
- ✓ Automatic restart after icing
- ✓ Preventive heating controller
- ✓ Lightning detection system
- ✓ Relative pitch angle measurement
